COORDINATOR'S DESK

Dear Parents,

I trust that you are taking care of yourself in this crucial time!

As you are aware, we have successfully completed our theory classes by streaming the lectures online/offline in this pandemic situation.

In the light of the same, DPSI has adjusted the sails to face the sweeping winds of change. The aim is to equip the students to emerge as full-fledged human beings who continue to grow in knowledge, curiosity, courage, creativity, achievements, confidence, competence with sense of fulfillment and understanding.

It is the prime duty of educational institution to promote strong positive character traits and foster creativity and innovative thinking among students to teach not to be afraid of failure but strive hard to achieve success for excellence, make them learn to see things in proper perspective and above all to be disciplined.

I hope and pray that the students of our school will scale great heights and keep the DPSI flag high.

We humbly ask for providential blessings as we march and face the challenges that ever new day might bring.

MATHEMATICS

Class VI

Topic Covered- Types of Polygons

To Draw different types of Polygons.

Students used A4 size colour paper, white paper, colors, sketch, scale, pencil to complete activity. All the students performed the activity with discipline and curiosity.

They were interested in knowing more about Types of Polygons.

Class VII

Topic Covered: Addition of whole numbers

Class VII students performed Maths activity to verify that addition of whole number is commutative.

Students used graph strips, white paper, cardboard to create the activity. All the students present in the class performed the activity with discipline and curiosity.

They were interested in knowing more about whole numbers.

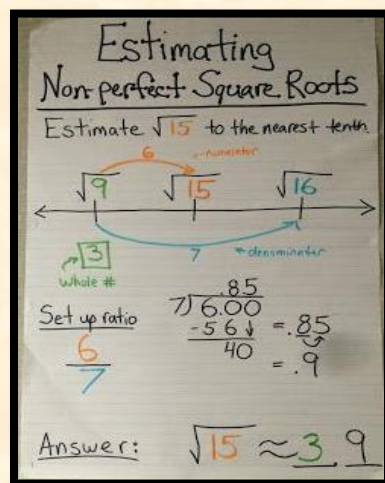

Class VIII

Topic covered: Square and square Roots,

An activity on observing the patterns of square e.g. 1^2 , 11^2 , 111^2 was conducted in all sections of class VIII. This was considered as their monthly activity.

The aim of the activity was to test the logical and reasoning abilities of the students. All the students participated and did it with full interest.

It was a wonderful learning experience for the student as the activity helped greatly in enhancing their reasoning skills.

SCIENCE

Class - VI

Topic Covered: Sprouting Seeds

Material required - Chana or moong, water, Container(vessel), cotton clothes.

This activity was conducted in Class- VI. Students took some dry seeds of moong Or chana. They put a small quantity of seeds in a container and filled with water and left this aside for a day. Next day they drained the water completely and left the seeds in the vessels. Students wrapped them with a piece of wet cloth and set aside.

Next day, Students observed that a small white structure may has grown out of the seeds.

By this activity Students concluded that such seeds that have white structure are said to be Sprouted and this process is called Sprouting.

Class VII

Topic Covered - Role of Saliva in breaking starch into sugar.

This activity was conducted in class VII. Students took two test tubes labelled them 'A' and 'B'. In test tube 'A' students put one teaspoonful of boiled rice, In test tube 'B' kept one teaspoonful of boiled rice after chewing it for 3 to 5 minutes. Then added 3-4 ml of water in both the test tubes. After this they poured 2-3 drops of iodine solution in each test tube.

Students observed that the color of test tube 'A' change into black color and test tube 'B' remains unchanged.

. By this activity students concluded that saliva converts starch into sugar.

Class VIII

Topic Covered: Separation of seeds

In this activity students learned, how to separate good quality seeds from a mixture of good and bad seeds, the soaked seeds in water, and found out that those seeds which sink at the bottom were of good quality and those which float in water are seeds of bad quality.

Social Science

Class VI

Topic Covered : Occurrence of Day and night and the seasonal changes.

How it is shown?

The seasonal and the day-night changes were shown through the activity conducted on summer and winter solstice and Equinox.

The students were labelled as The Sun and The earth. The student labelled as The Sun was made to stand in middle and the student labelled as the Earth was made to stand around the Sun at four different places.

Outcome- The students were able to learn about how the revolution of the Earth results in seasonal changes. The part of the Earth which receives the sunlight experience summer and the other part experience winter Solstice. While in Equinox the whole Earth receives the sunlight which results in equal day and equal night.

The rotation of the Earth results in day at a place and night at the other.
